

SIX AMAZING

SUBARU

**DESIGN** AND **SAFETY**  
FEATURES

The Symmetrical All-Wheel Drive system is designed to optimize both traction and balance, keeping the power routed to all four wheels.

EyeSight Driver Assist Technology is an extra set of eyes on the road and, if need be, an extra foot on the brake when you drive.

Found in every Subaru model, the horizontal layout of the boxer engine combines balance with power and efficiency.

Subaru DriverFocus helps detect distracted or drowsy driving and then delivers alerts to bring attention back to the road.

Every Subaru has a rigid, high-strength unibody, which provides not just crashworthiness but also a solid base for the suspension, creating a responsive, quiet, and secure driving experience.

Rear Vehicle Detection technologies maximize driver awareness using Blind-Spot Detection, Lane Change Assist, Rear Cross-Traffic Alert, Rear-Vision Camera, and Reverse Automatic Braking.
